

# DRUG TRENDS

Featuring a speaker from the Iowa Division of Narcotics Enforcement who specializes in the subject matter.

The Division of Narcotics Enforcement (DNE) was established to serve as the lead agency in the state providing public safety through investigative enforcement of laws relating to narcotics and other controlled substances. The goal of the Division is to serve the citizens of Iowa, to investigate illegal narcotic operations within the State of Iowa, and work with authorities outside the State to stop the distribution, manufacturing and abuse of illegal narcotics. Successful investigations and prosecutions of the Division's cases are due in large part to the Division's cooperative efforts with other local, state, and federal law enforcement agencies.

This presentation will provide participants with information regarding current drug trends in Iowa, specifically Northeast Iowa. Information regarding the drug trends law enforcement officers are currently encountering in this area of the state will provide an up-to-date foundation for discussion of what the current impact of those drugs are in our communities. Participants will be educated about indicators of drug use, distribution, and manufacturing; including environmental indicators (paraphernalia and drug/manufacturing related items) as well as behavioral indicators including physical and psychological effects of various drugs. Questions and discussion will be welcomed and encouraged!
